Identification
and move safely

Our standard formats:

Version	Format	Color
Rolls	50 mm x 45 m	red/green/yellow/blue/black
Points	50/60 Ø mm	red/green/yellow/blue/black
T-pieces	130 x 190 mm	red/green/yellow/blue/black
Angles	130 x 130 mm	red/green/yellow/blue/black
Cross	190 x 190 mm	red/green/yellow/blue/black
Keep distance	200 Ø mm	

By default, we use a base foil of approx. 110µm thickness.
The total thickness incl. adhesive is more than 200µm. The most current versions are listed. If your type of dimension is not listed, please contact us.

Use the advantages

Efficient Flow

Marking	Marking
with self adhesive floor marking	painted floor marking

Innovative identification ✓	Conventional identification ✗
UNIQUE bonding of the floor marking	**complex color coating of soils**
	faster abrasion of the paint, is difficult to clean
labeling remains permanent	**regular renewal necessary**
Storage places and emergency exit marking	**Storage places and emergency exit marking**

Modern Identification

Conventional Identification

- **Clear storage place marking / escape route marking / safety marking**
- **High mechanical resistance withstand forklift traffic**
- **Extreme abrasion and scratch-resistanty**
- **High color coating ensures long durability**
- **Excellent adhesion on rough surfaces**
- **Labeling fulfills legal guidelines**
- **Custom sizes & shapes are possible**

Product

- Quick application of the floor marking is guaranteed based on its self-adhesive design
- Multiple adhesive selections are available for different substrates
- A special coating of the labeling allows an easy cleaning, as well as a high mechanical resistance
- Individualized imprint clearly describes the storage location / path
