

# Shipping information for self-adhesive products

The correct shipping packaging depends on the type, weight and load capacity of the shipment.

## Outside Packaging

The shipment is well protected using cardboard packaging made out of high-quality, moisture resistant and at least two fluted carton. Particular attention is paid to the corner, the surface and the edge protection. New cardboard boxes are used with every shipment. The heavier the content is, the more stable the outside packaging.

Size	Cardboard box dimensions	Weight
1	190 x 190 x 150 mm	1 - 2 kg
2	255 x 195 x 195 mm	1 - 3 kg
3	390 x 250 x 200 mm	1 - 5 kg
6	370 x 275 x 290 mm	7 - 15 kg
7	470 x 285 x 300 mm	7 - 20 kg
8	380 x 380 x 270 mm	10 - 20 kg

## Inside Padding

All cavities are completely filled with padding material. The goods inside the package are fastened so they are unmovable. The padding material is matched precisely to the shipped goods.

### Filling Material - brown paper:

We use „brown paper“ as standard filling material. It can be disposed of at commercial paper points.

### Filling Material - Renatur®:

Renatur® is used as an alternative filling material. These are cylindrical packaging chips made of starch, which are 100% biodegradable, lightweight, shock-absorbing and anti-static.

## Labeling

### Identification Label:

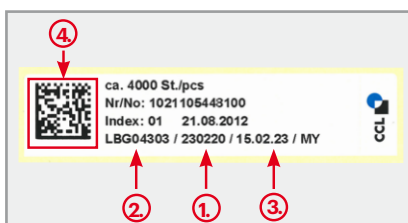

1. Production batch
2. CCL article
3. CCL production date
4. Material ID

### A. Label roll:

Each roll is shrink wrapped in PE-foil to prevent soiling. Each roll is provided with identification labels on the inside and outside.

### B. Package:

The cardboard box receives an identification label, a customer label and application and storage requirements label. On request a VDA material tag can be attached.

## Closing the Package

The package is sealed with a well adhering tape made of paper. The tape is imprinted with CCL logos, thus making an unauthorized opening immediately recognizable. The sides are closed off tightly and offer stability for a secure shipment.

## Shipping Method

Generally, we ship the goods with UPS. Should our standard shipping by cardboard boxes not meet your requirements, we are able to offer you customized shipping solutions. Thus we use SLC containers in the logistics chain for renowned customers.
