

**Power up your ride with our  
eBike labels and functional parts**

# Upgrade your eBike with our reliable labels and parts

Unlock the full potential of your eBike with our range of state-of-the-art high-tech products. From highly functional labels to advanced printed electronics, we offer a wide range of innovative solutions that transform your eBike experience. Discover the future of eBikes and revolutionize your bike with our exceptional range of products.

## Battery Indicator Label (HMI)

A graphic overlay with integrated LEDs to show the level of charging of an eBike Battery. Due to the adhesive layer, the whole part can be easily applied on your battery system.

## Paint Protect Label

A multi-layer construction, which includes a laminate that can be easily removed after the painting processes to guarantee identification through the whole production and beyond.

## Doming Label

Discover the brilliant world of Doming Labels - an innovative solution to enhance your products with high-quality, three-dimensional labels.

## Chrome Badge Label

Enhance the branding of your product with our chrome badges. The labels are easily intergratable into your workflow and have an application tape to apply them to your part.

## Die Cut Parts

From a wide range of different materials, CCL Design can produce custom-fit die cut parts as Gaskets, Damper Foams or Protection Foils. The opportunity for multi-layer constructions enables also applications with multiple components, allowing for more cost-effective device assembly.

## Human Machine Interface Applications (HMI)

Are custom-designed labels that provide a visual interface between the user and a device. This graphic overlay can be enhanced with the possibilities of printed electronics all in one unit.

## Security Label

Labeling with special features offers protection against fraud and abuse, product privacy, sealing function and is difficult to imitate.

## Warning Label

Warning and information labels are highly durable and resistant. This makes them suitable for use in various environments and conditions.

## Waterslide Transfer Label

Waterslide transfer labels are flexible labels that can be customized and repositioned after application. They are soaked in water and applied to a smooth surface. They adapt perfectly to the object.

## Rear Indicator Label

Use the advantages of printed electronics and integrate it as a security feature directly on your product to increase the visibility of your customer in daily traffic hazards.

## Product Labeling

Our labels can almost do it all allowing you to receive components for individual product labeling with a maximum amount of flexibility. The use of different production technologies ensures you high-quality products. Challenge us to find innovative solutions together.

## Identification Systems

Turn your production into a data all-rounder. Whether it be in-house printed labels, the universal recording of barcodes or data transfer to your computer system - no problem. We offer complete ID system solutions, including hardware and software so that you can take care of the essential: your business.

## Labeling Systems

Systematic labeling. Our innovative labeling systems are available in standard versions or as special customized solutions. Put us to the task and we will deliver the perfect system. Our comprehensive service offering ensures smooth operation. Challenge us.
