

Permanent labeling for the industry

Perfect Labeling at any point of the production and distribution chain.

Labels simplify the identification of products and packaging. Label information is used to control the flow of goods and to optimize operating processes. Continuous development of industrial products, changes in legislation and new regulations always need innovative technical or decorative labeling.

We offer a variety of product solutions for labeling throughout the production process.

Incoming goods

1

Label variety - Variety of Labels

In modern material management the process is controlled by barcode labels. We offer special materials which can be printed in-line using thermo transfer printing. With identification systems and the printed barcodes, information can be obtained at any time.

Production

4

Product Labels

The need for decoration or information space on the product is increasing all the time. Our portfolio can cover them all. From simple product labelling up to multi-layer solutions. Printed, of course, with the latest state-of-the-art printing technologies like the environmentally friendly and resource-preserving digital technology.

Office

2

Documentation Labels

In addition to a barcode controlled material management, similar techniques are used to handle the orders. Special material sheets are printed with all order-relevant data. Dynamic reading systems make these data available and individual label-parts can be used for documentation.

Storage/Logistic

5

Logistic Labels

During the internal and external material flow, transport and shipping boxes are labeled in many different ways. And we have the right solution. Our placeholder label optimise your logistic process and help improve sustainability of the process.

Research/Development

3

Barcode Labels

Individual marking of separate tests is very important in R&D. Our system solutions offer specific single printouts for perfect labeling. This includes an extremely high resistance of the used materials against all kinds of mediums.

Areas and pathways

6

Floor Marking

Professional and compliant floor marking is one of the most important tasks within your company. Floor marking tape can be used to mark aisle ways, pallet storage areas and to improve your organization and security. Shapes such as dots, corners, and T's are a quick and easy floor marking solution to mark off storage areas to create better flow in the workplace.

Milestones in the production of labels

Consulting

Customer specific solutions are developed together. We support you from the briefing to the final labeling concept.

Development

Our R&D department is testing today's products while developing tomorrow's solutions.

Production

Production of labels is achieved through consistent continuous quality assurance.

Finishing

After labels are produced, large rolls are then converted into smaller more manageable rolls or even individual sheets.

Quality assurance

With the highest quality demands and by customer request, we can offer 100% print image control of single features of series parts.

Logistic

Our in-house shipping department guarantees professional, on-time distribution of products.

Regulations and standards to safeguard a clean environment.

Environmental protection is an important part of our integrated management systems. With its certification to ISO 14001, We have provided further proof of its exemplary standing on the environment and its proactive handling of our most important resources to create a sustainable future.

The most suitable system for perfect labeling

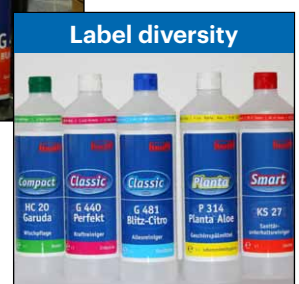

Our product variety and service combined with our customer specific label applicators complete our one-stop solution approach. Precise application of labels and other die-cut parts are second nature to us. From the simplest application to a fully integrated in-line labeling system - we develop and manufacture the perfect solution for you. By using our labeling system, your product can show its true colors.

Assembly line

Labeling

Label diversity

-  Product Labeling
-  Identification Systems
-  Labeling Systems

Product Labeling

Our labels can almost do it all allowing you to receive components for individual product labeling with a maximum amount of flexibility. The use of different production technologies ensures you high-quality products. Challenge us to find innovative solutions together.

Identification Systems

Turn your production into a data all-rounder. Whether it be in-house printed labels, the universal recording of barcodes or data transfer to your computer system - no problem. We offer complete ID system solutions, including hardware and software so that you can take care of the essential: your business.

Labeling Systems

Systematic labeling. Our innovative labeling systems are available in standard versions or as special customized solutions. Put us to the task and we will deliver the perfect system. Our comprehensive service offering ensures smooth operation. Challenge us.
